

Db.sqlite Data base related coding :

- ♦ **A. Delete Existing Migrations (Except \_\_init\_\_.py)**

```
rm -rf core/migrations
```

- ♦ **B. Remove the SQLite Database (⚠ This Deletes All Data)**

```
rm db.sqlite3
```

- ♦ **C. Create New Migrations**

```
python manage.py makemigrations
```

- ♦ **D. Apply Migrations**

```
python manage.py migrate
```

- ♦ **E. Create a Superuser (If Needed)**

```
python manage.py createsuperuser
```
